WOMEN 4 GREEN
Women in power for a Green Economy

THE PROJECT

The project “Women4Green – Women in Power for a Green Economy” aims at raising young women’s awareness and interest in green jobs and empower them to decide for a job in this field providing them with the knowledge required to do so.

The green economy is the economy of the future. Achieving a green economy requires innovation on the one hand, and preparing the workforce for the jobs of the future on the other hand.

This bears an opportunity for relevant and sustainable employability, especially for the underrepresented group of women, as the professional participation of women is demonstrably crucial for the implementation of a green economy. Therefore, the project draws on the Sustainable Development Agenda and the Sustainable Development Goals (SDGs) to empower and inspire young women to choose careers in this future-relevant field.

GOALS

raise young women’s awareness and interest in green jobs

empower young women to decide for a green job

provide guidance of how to increasingly interest and recruit young women for future green jobs

contribute to gender equality in green jobs

RESULTS

1.

catalogue of green professions and skills

2.

concept of learning (didactic concept & curriculum)

3.

podcast development & community building

4.

learning material

5.

workshop design for career orientation

6.

guide for youth career counselling
